Profile

Entry-level Software Developer with knowledge of Java , HTML, and CSS, along with beginner-level machine learning experience. Strong interest in Artificial Intelligence, IoT, and software development. Quick learner with hands-on experience developing automation, machine learning, and safety-monitoring projects. Motivated to apply programming and problem-solving skills to real-world applications.

Professional Experience

Full Stack Development Intern

12/2025 – 01/2026

Jesko Technology

Coimbatore

- Assisted in developing web applications using **HTML, CSS, and JavaScript**.
- Worked on both **frontend and backend components** of the application.
- Used **Git and GitHub for version control and project collaboration**.
- Participated in testing and improving the **user interface and user experience** of web pages.

Education

B.Tech - Artificial Intelligence and Data Science

2024 – 2028

KPR Institute of Engineering And Technology

Coimbatore

Higher Secondary

2023 – 2024

Jayam Vidhyalaya Matric Higher Secondary School

Dharmapuri

Skills

Programming

- JAVA - Object Oriented Programming (OOP)

Web Development

- HTML
- CSS

Machine Learning

- Data Cleaning
- Feature Selection
- Model Evaluation

Tools & Technologies

- Git,
- GitHub

Certificates

- Data Analysis Using MS Excel (2025) Jesko Technology Full Stack Development Intern - (2025)
- Building Your First React Application , Bootcamp Completion(2025)
- First Place - Astro Photography, Tamil Nadu Astronomy & Science Society, Youth Astronomy and Space Science Congress (2025)
- Best Volunteer, KPR Institute of Engineering and Technology, Fiestaa'25 - AI Powered Techno Cultural Fest(2025)

Projects

AI Resume Skill Gap Analyzer (Ongoing) :

- Developed an NLP-based system to extract and analyze skills from resumes using Python.
- Compared candidate skills with job requirements to identify skill gaps.
- Implemented text processing techniques for automated skill extraction.

E-Commerce Web Application :

- Built a full-stack eCommerce application using the MERN stack (MongoDB, Express, React, Node.js).
- Implemented product browsing, cart management, and order placement features.
- Designed REST APIs and deployed the application on Hostinger.

Product Review Sentiment Analyzer :

- Developed a machine learning model to classify reviews as Positive, Negative, or Neutral.
- Applied NLP techniques for text preprocessing and feature extraction.
- Implemented the sentiment classifier using Python and Scikit-learn.
